This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

**About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. # PREFATORY NOTE

AT a meeting of the Board of Fellows and Overseers of Bates College, held in 1913, Prof. Jonathan Y. Stanton, Oliver B. Clason, of class 1877, and Harold A. Allan, of class of 1906, were appointed a committee to compile and publish a General Catalogue of the college. The first General Catalogue was published in 1891. Since then the large increase in the number of graduates each year and the length of time elapsing since the publication of the first catalogue have imposed a great amount of labor upon your committee in getting together the necessary material.

Cobb Divinity School was established at Bates in 1870, and for thirty-seven years was maintained as a department of the college. It has been the aim of your committee to get as complete a record of the graduates of this school as practicable, not only for the use of this catalogue but for all future ones.

It was deemed advisable to compile a record of those students who attended Bates but did not complete the full four years course. This was attempted for two reasons; first, to show that the college has contributed to the education of a large number of students not included in its list of graduates; and, second, to show a proper appreciation of their devotion and loyalty to the college and to strengthen the hope that their interest in it will always abide. The past few years have given proof that many of them are among its most loyal friends.

The abbreviations used will be readily understood without explanation. In connection with degrees and professorships held in the college, to avoid the constant repetition of the word Bates, it has frequently been omitted where it can be clearly understood.

The work has been a difficult one, and many desired facts could not be obtained; yet we hope what we have accomplished will be appreciated. College records, catalogues, and the Bates Student have been freely consulted, together with Genealogies and Town Histories. Circulars have been sent to the graduates and non-graduates, where their addresses were known, and in many cases several times. Great assistance has been rendered by graduates and friends of the college,

too numerous to mention, and to all these the thanks of the committee are extended.

It would be unavoidable that in a book of this character, composed in a large part of names and dates, that typographical and other errors occur as well as omissions that can be avoided in future editions, if all who notice such mistakes will report promptly to the registrar of the college.

O. B. C.
